Video Script:

Hey this is Truder, over here at downtown vapes, today I'm gonna teach you how to do TORNADOES.

So like, keep your face even, with the table. and just stay forward motion and up, (that vape's flying)

Weeeeeee, weeeeeee, weeeeeeee, weeee, tornaders!

uhmm So basic technique, I just kinda put my hand like that to the table and just slowly go like that. I usually just rest my pinky on the table, and kinda just gently go up and, you know, just go up as far as you want the tornado to go.

To do a tornado, first you have to make sure that you have sufficient amount of room. So you can lean forward and let the vapor just cover the area of the table in front of you.

I'm gonna demonstrate now. When you put the vapor in the table, make sure that it's nice and milky and flat and you just take your hand and move it up.

(it looks like you need to watch our youtube page)

So when I do it, when I do a tornado, I kinda just have my hand straight. and then when im go to release with my pinky i twirl it, it creates a little vortex.

and you can go with just little amount of smoke or. but you dont have to do it real fast, you just, or you could do it real fast or do it slow.

I'm not very good at tornadoes, but im gonna give it a shot.
